

# INSTALLATION GUIDE

## Hip and valley clip for cutted tiles

1 Cut the tiles as needed along the hip and position them. Tiles whose lug has been cut need to be secured against falling.

2 The "stainless steel hip and valley clip for cut tiles" product is an ideal solution to fix these tile. The clip end has to be fixed to the cutted edge of the tile.

3 Fasten the wire using a screw or nail to the hip batten.

4 The cut tile clip is suitable for tile thicknesses between 7-22 mm, making it compatible with all models in the swissporTON product range.
